

## VARIETY IS THE SPICE OF LUSIVE

In our 16 years in business, we have worked with the most acclaimed interior designers in the world, bringing their design ideas and inspirations to life. From a contemporary streamlined feature at the center of a casino to a colonnade of glittering crystal chandeliers gracefully adorning a grand ballroom, the Lusive team has experience in producing every fixture style you can imagine.

We are renowned for our creative approach to design and production – and for offering a stunningly diverse selection of materials to bring design to life. From faceted Austrian crystal to hand finished, faux-wood ‘railroad ties’, from hand-blown Venetian glass to industrial metal meshes, Lusive continues to break the mold by offering options to suit style and budget.

## MODERN/CONTEMPORARY

With clean architectural lines and a futuristic aesthetic, Modern & Contemporary fixtures exude an air of fresh innovation and cutting edge design. Incorporating intriguing shapes and using unexpected materials in imaginative ways, these fixtures elevate the spaces they illuminate.

## HISTORIC/TRADITIONAL

Inspired by Old World aesthetics, Traditional lighting exemplifies a refined elegance - rich in historical influences. Complete with touches of grandeur and classic elements, Traditional lighting is all about balance and detail - where symmetry is paramount and style is utterly timeless.

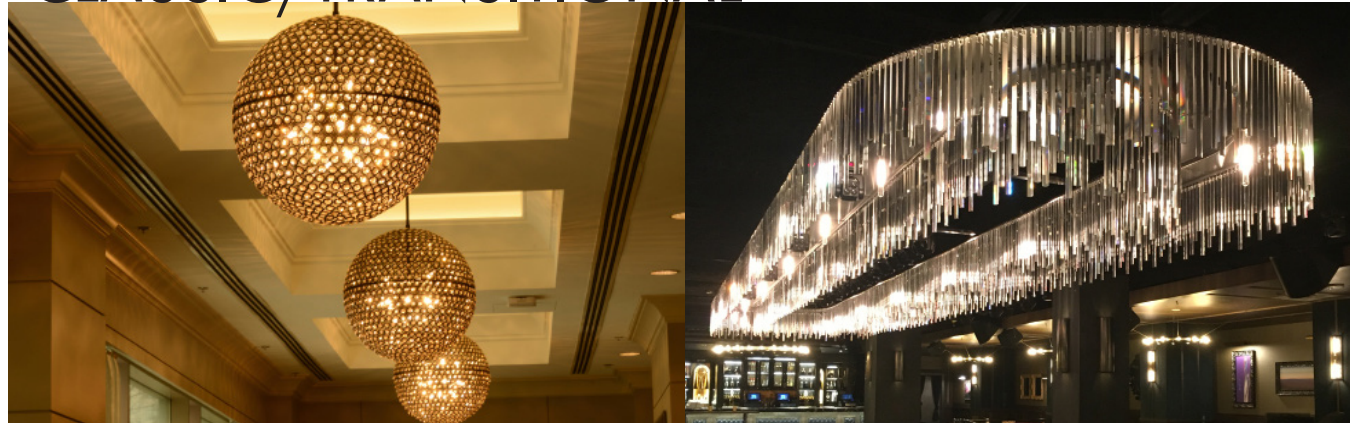

## CASCADES/DROPS

Like floating, illuminated waterfalls, Cascading fixtures are often the awe-inspiring focus of a space. Whether sweeping down the center of a spiral staircase or shimmering above a long communal table, cascading installations of repetitive design elements in similar tones and textures create fluidity and movement.

## CLASSIC/TRANSITIONAL

Often referred to as “classic with a contemporary twist,” Transitional design is a perfect blend of traditional and modern style, the midway point between old-world traditional and chrome-and-glass contemporary. Forged together, they form a perfect balance between masculine and feminine, old and new.

## THEMED

Certain spaces require design that speaks to a specific theme. Articulated best through creative design and the visionary use of detail and references, these themed features can include tiered pendants of glass beer bottles for a casual outdoor bar or thousands of hand cast glass “coral” petals swirling across the ceiling of a grand ballroom in Hawaii.

## RUSTIC/LODGE

Inspired by nature itself, the Rustic aesthetic utilizes raw and unfinished materials and traditional processes. Textured wood, organic glass and natural stone, aged leather and hemp rope - stripped clean of excess glitz and glamour, style and material work together to create warm, traditional environments.
